**NOTES:GLIDE WAX, HS06 and TS06 will run great. On distance races over 15km, Marathon provides superior durability, will resist picking up contaminants and provide excellent glide. Race profile has a long climb to the finish. Classic Wax:perform all glide wax and top coats first before working binders and kick**

wax. Tape off Glide and Kick Zones. Depending on the melt/freeze cycle, you may want to test KB20 binder klister and KX35N with a cover of VP40 or VP45. Watch the weather! If using skin skis, treat skin with Swix Skin Boost(N21US) for enhanced glide.
